Customer summary

Two illustrative resources need review. The team should confirm each notice against the customer's configuration, agree an internal target and retain completion evidence. This report is not a complete estate assessment.

SIMULATED AFFECTED / EXAMPLE ACTION

Virtual machine — LSv2, G, GS, F, FS, Fsv2, B, Av2 - Series

Technology: Azure Virtual Machines · Fictional resource: sample-service-1

Vendor date: 2028-11-15 · Internal target: agree after scope review

Owner: Lifecycle team · Status: Planned

Next step: read the source notice, confirm the affected configuration, test the supported replacement and agree a customer communication date.

Evidence: Simulated Advisor observation only; not live verification.

Customer communication draft

We are reviewing upcoming platform retirements relevant to the technologies recorded in your inventory. Our next step is to confirm which configurations are affected, agree a migration plan and schedule validation. We will distinguish confirmed impact from items still under investigation and retain completion evidence with the review.

Draft for human review. No customer message is sent automatically.
